

Energy

The pictures below show the initiatives we have taken to reduce the energy consumption in our school. Every light switch had a small green sticker to remind people to turn off the lights, however the Eco Committee thought that they were too small and were not noticeable enough. Therefore, they decided to create A5 posters to go next to the lights as these were more visible. Each classroom had a tally chart to monitor the energy usage. During lunchtimes and break times (when rooms were empty) the Eco Committee checked whether the lights/smart screen/computers had been turned off to save energy while not in use and added to the correct column on the tally chart. When classes had received 10 “happy tallies” they were awarded an online certificate!
